

# Purpose, disclaimer and other cautionary statements

### **DOCUMENT PURPOSE:**

This presentation has been prepared with the sole intention to facilitate the understanding of Transelectrica's operational and financial results by the general investing public (shareholders, creditors, analysts, financial media). Therefore it is of a purely informative nature. **This presentation is not an offer, invitation or a recommendation to trade in securities issued by the Company.** The detailed financial statements and the full report prepared in accordance with capital market regulations are available online at <a href="https://www.transelectrica.ro">www.transelectrica.ro</a>.

#### **FINANCIAL NUMBERS:**

reporting period: 1st January 2021 – 30th September 2021

reporting standard: International Financial Reporting Standards (IFRS)

basis/scope: standalone (unconsolidated)
external audit: not audited by external auditor

rounded numbers: for the ease of reading, certain figures used in this presentation (tables and charts) are displayed in millions and rounded to such

unit or to one or two decimals. In some cases this led to minor differences between totals and the sum of the individual elements

thereof (rounding errors)

#### **REGULATED TARIFFS:**

For year-over-year comparability purposes, in this presentation the streams of income generated from two regulated tariffs in the year 2020 i.e. transmission tariff and dispatching tariff, are presented cumulatively as a single stream of income i.e. transmission. Starting 1-Jan-2021 the two regulated tariffs i.e. transmission tariff and dispatching tariff, merged into a single tariff i.e. transmission tariff.

					Full post-Covid recovery of local electricity demand

\*consumption/generation numbers do not include power plants' own electricity consumption. Consumption includes (i) consumption for hydro pumped storage. and (ii) energy losses in transmission and distribution networks. Cross-border net flow is calculated based on physical flows (export-import) aggregated across borders

### Regulatory framework

Profit-allowed segment:

Starting 1-Jan-2021 the two regulated tariffs i.e. transmission tariff and dispatching tariff merged into a single tariff i.e. transmission tariff

Pass-through segment - balancing process with two sub-processes i.e. capacity (stand-by reserve) and energy:

Stand-by balancing back-up capacity services (balancing capacity services): lower y/y gain in 9M2021 driven by the tariff cut as of 1-March 2021

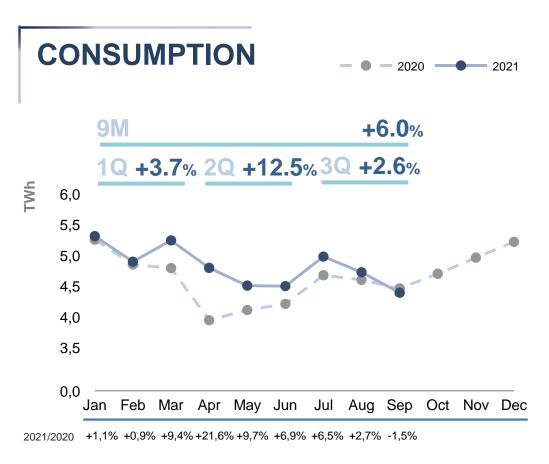

Energy balancing services: temporary gain in 9M2021 (Feb-Jun) due to new settlement rules in place since 1-Feb-2021 (balancing financial neutrality to be achieved under a new cross-segment framework i.e. any balancing gains/losses to be offset over the next year(s) by adjustments to the transmission tariff)

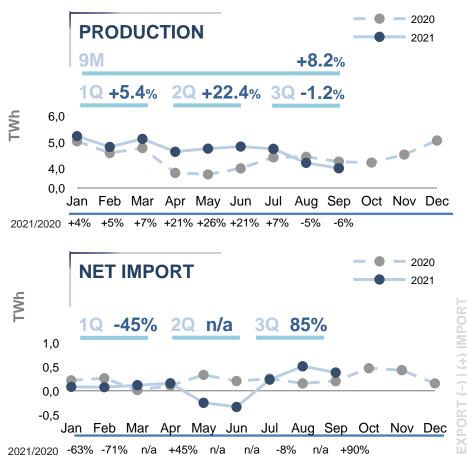

# **Highlights | operational trends**

## Domestic demand – post-Covid19 full recovery in 9M2021 (+6% y.o.y.)

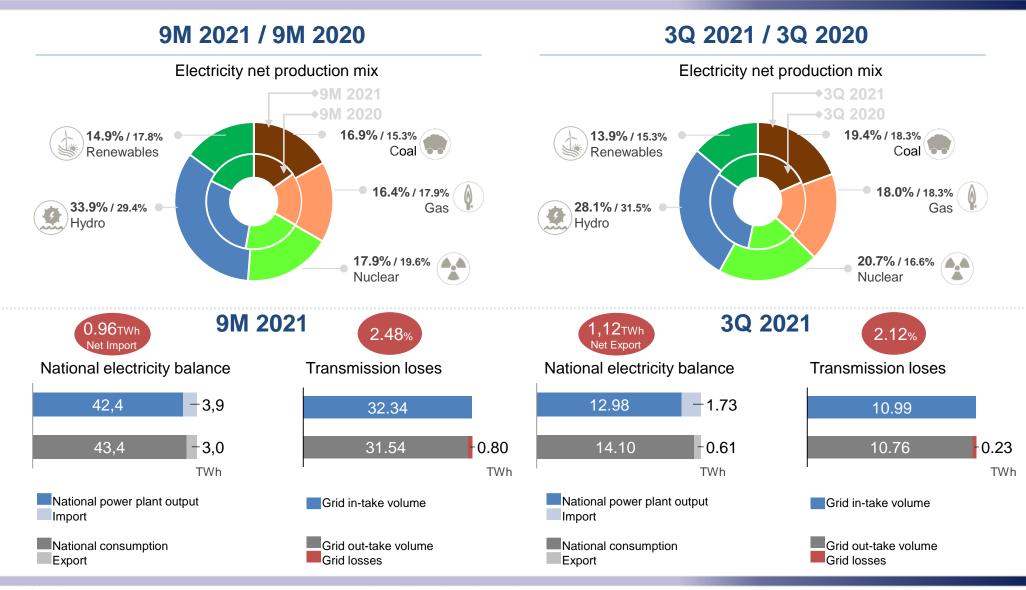

Domestic production – increase in 9M2021 (+8.2% y.o.y.)

Consumption and generation numbers do not include power plants' own electricity consumption. Consumption includes (i) energy losses in transmission and distribution networks. and (ii) consumption for hydro pumped storage. Cross-border net flow is calculated based on physical flows (import-export).

EBIT	100	199	-99	-99,6%	
EBT	97	197	-100	-103,4%	
Net Income	81	152	-72	-88,6%	

#### **Volumes**

•Higher volumes (growing electricity demand incl. base effect of Covid-19 lockdown activated mid-March 2020)

#### **Profit-allowed** segment

- Higher costs significant increase in grid losses cost (higher loss volumes due to a greater energy loss factor combined with higher market prices especially in 3Q)
- **Growing revenues** (post-Covid volume recovery and higher tariff) partly offset the increase in costs

#### Pass-through segment - temporary gains

#### Stand-by balancing capacity services (balancing reserves)

Lower y.o.y profit due to the tariff cut as of 1-March 2021 (accrued temporary gains of ca. Lei 95 millions as of 1-March 2021 to be reversed within a 2021-2022 timeframe: 50% in 2021 Mar-Dec and 50% in 2022 Jan-Dec - tariff claw back process monitored by the Regulator).

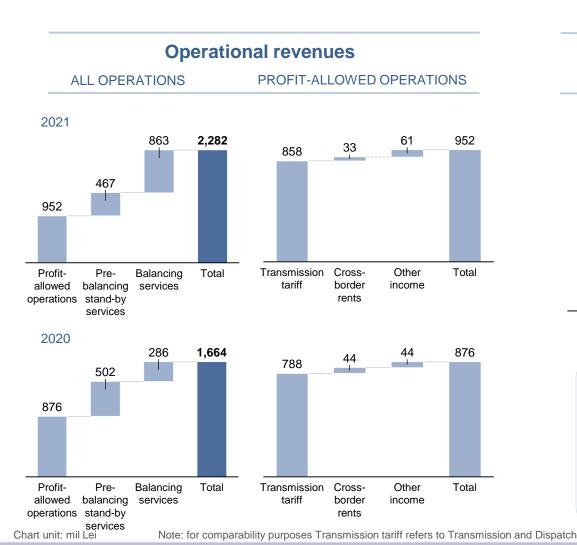

#### **Energy balancing services**

Temporary profit in 9M2021 due to new settlement rules in place since 1-Feb-2021 (balancing financial neutrality to be achieved under a new cross-segment framework i.e. any balancing gains/losses to be offset by adjusting the transmission tariff). Temporary gain to be reversed over the next year(s) (tariff claw back process monitored by the Regulator). Balancing operations (cost of balancing energy vs. income from imbalance settlement) remain neutral to Transelectrica's profit generation capacity. Temporary gains/losses are fully offset ex-post by tariff adjustments to secure Transelectrica's financial neutrality according to the regulations in place.

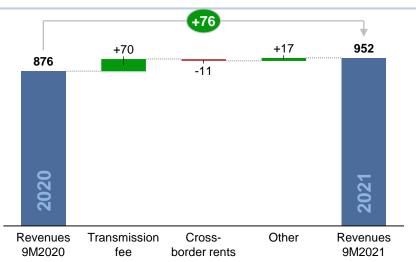

# **Financial results**

### **Operations | Revenues**

### **Operational revenues**

PROFIT-ALLOWED OPERATIONS: BREAKDOWN

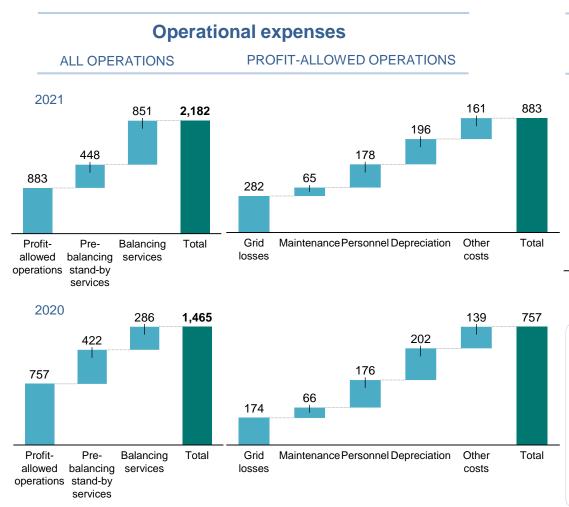

#### DRIVERS BEHIND THE DECREASE IN REVENUES

- ▲ Higher volumes (inclunding the strong base effect of Covid19 hard lockdown in Q2 2020)
- ▼ Lower income generated from the sale of cross-border grid capacity (lower demand for cross-border trading)

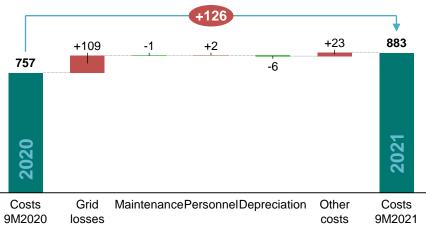

# **Financial results**

### **Operations | Costs**

### **Operational expenses**

PROFIT-ALLOWED OPERATIONS: BREAKDOWN

#### DRIVERS BEHIND THE EVOLUTION OF COSTS

- ▲ Grid losses (higher loss factor due to unfavorable grid flow patterns and weather conditions, higher electricity market prices)
- ▲ Other costs payments executed under the phantom stock plan of previous executives and directors (2013-2017)
- ▲ Personnel the increase in salaries was offset by the reversal of a provision in connection with the phantom stock plan of previous executives and directors (2013-2017)

Chart unit: mil Lei

260 Lei/MWh (▼ 4%) FORWARD MARKET (FM) 367 Lei/MWh (▲ 92%) **DAY-AHEAD MARKET (DAM)** 451 Lei/MWh (▼ 47%) BALANCING MARKET (BM) (Net, BRP fee included) PURCHASE MIX (VOLUMES)

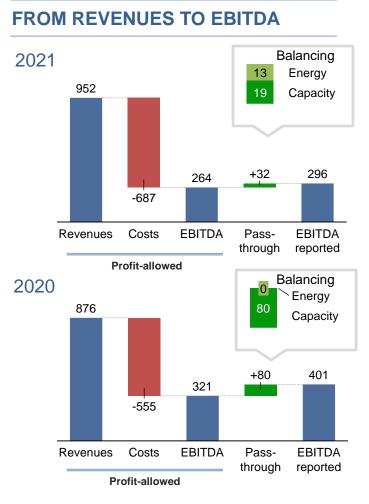

### **AVERAGE PRICE / PURCHASE MIX**

331 Lei/MWh (▲ 32%) **CROSS-MARKET AVERAGE PRICE PAID** 38%FM / 57%SPOT / 5%BM (2021) **PURCHASE MIX (VOLUMES)** 51%FM / 46%SPOT / 3%BM (2020)

# **Financial results**

## Operational profit | EBITDA

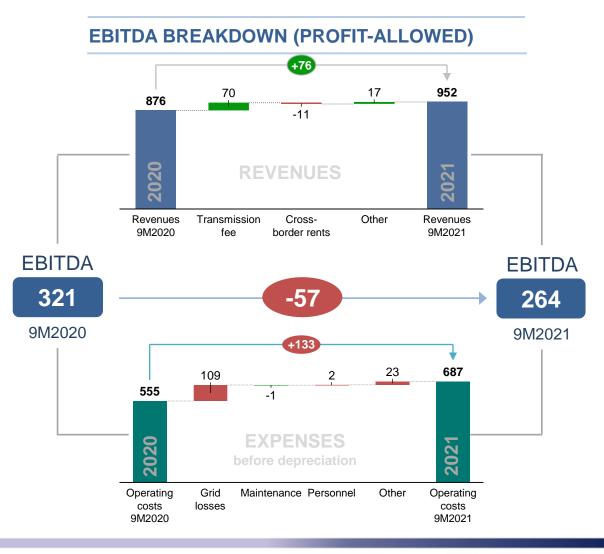

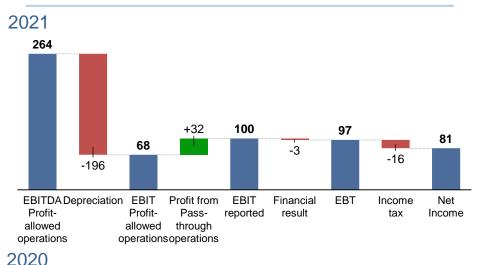

Chart unit: mil Lei

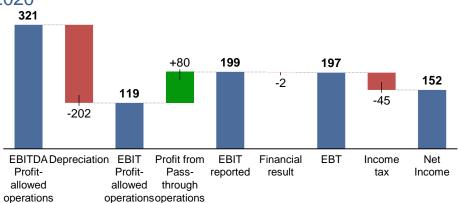

# Financial results

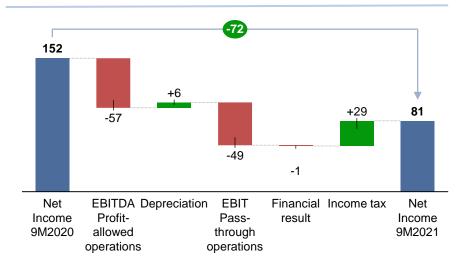

### From EBITDA to Net income

### FROM EBITDA TO NET INCOME

#### **NET INCOME BREAKDOWN**

### MAIN DRIVERS BEHIND THE DECREASE IN NET INCOME

- ▼ Deterioration of EBITDA from core operations (transmission) mainly driven by increasing operating costs i.e. grid losses, due to surging electricity prices in the wholesale market
- ▼ Lower EBIT from pass-through segment (tariff back logs)

Chart unit: mil Lei

### **Delivered in 9M2021**

509 Lei m

### New contracts

Total aggregate amount for contracts signed in 9M2021

248 mil lei - New internal line Gutinas-Smardan

96 mil lei - Modernization of Pelicanu grid substation

43 mil lei - Transmission capacity upgrade of internal line Stejaru-Fantanele

399 Lei m

### Capital expenditure

Amounts added to construction-work-in-progress in 9M2021

#### Selected items:

132 mil lei - New internal line Cernavoda-Stalpu

26 mil lei - New internal line Portile de Fier-Resita within the wider 400kV Wester Corridor project

23 mil lei - Modernization of Domnesti grid substation

102 Lei m

### Assets commissioned

Amounts transferred from construction-work-inprogress to fixed assets in 9M2021

of which RAB: 93 Lei m

#### Selected items:

15 mil lei - Commissioning of a new transforming unit in Sibiu Sud grid substation

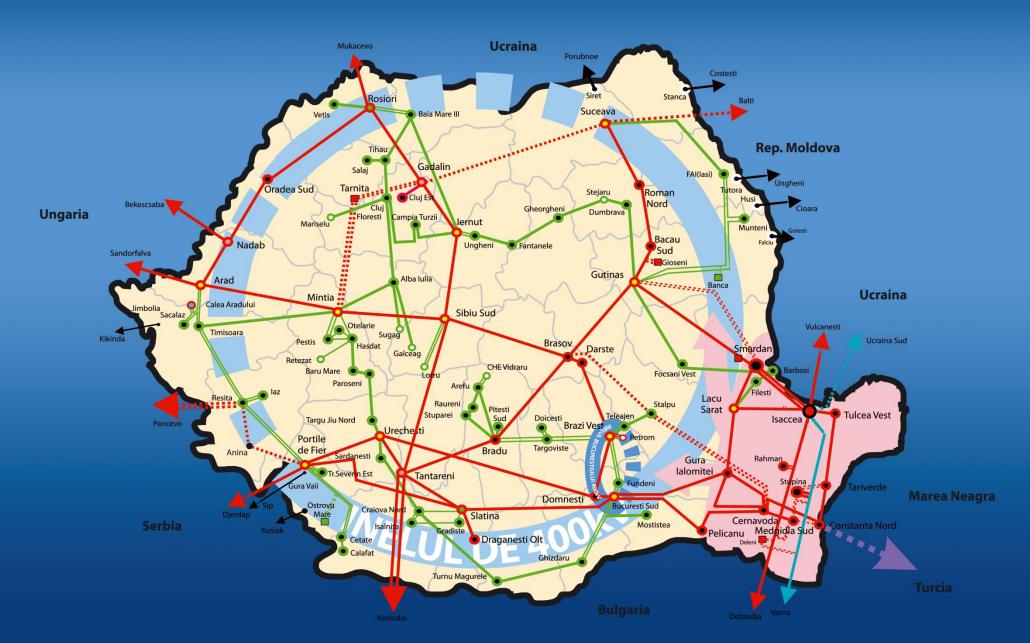

14 mil lei - Replacement of a transforming unit in Portile de Fier grid substation

12 mil lei - Commissioning of two electrical equipment units connecting two voltage control units to grid
