- ✓ on the Bulgarian border, the daily allocation is of implicit type as a result of the integration of RO – BG border in Single Day-Ahead Market Coupling (SDAC). In case of decoupling, the Joint Allocation Office (JAO) is the organizer of the explicit daily auctions (shadow auctions) for RO – BG border. Implicit intraday allocation with continuous trading is organized on the Bulgarian border, as a result of the integration of Romanian intraday market in SIDC (Single Intra-Day Market). In the event of decoupling, no explicit intraday auctions are organized on RO – BG border.
- ✓ on the Hungarian border, the daily allocation is of implicit type as a result of the integration of RO – HU border in Single Day-Ahead Market Coupling (SDAC). Starting with 08.06.2022 (for the delivery day 09.06.2022) the Flow - Based Day - Ahead Market Coupling was launched across the whole Core region (including the RO – HU border), thus optimizing the energy exchange between the bidding zones within the region. In case of decoupling, the Joint Allocation Office (JAO) is the organizer of the explicit daily auctions (shadow auctions) for RO-HU border. Implicit intraday allocations are held with continuous trading, as a result of the integration of Romanian intraday market in SIDC (Single Intra-Day Market). On this border the 15 minutes cross-border product is available. In the event of decoupling, no explicit intraday auctions are organized on RO – HU border.
- ✓ the long term auctions on Hungarian and Bulgarian borders are held by Joint Allocation Office (JAO) based on Allocation Rules for Forward Capacity Allocation (HAR) and border specific Annex. On these borders it is applied:
 - ✓ reservation of a percentage of interconnection capacity for short term auction, offered capacity being calculated as 80% of the minimum of available capacities of all periods of the month;
 - ✓ starting with July 2022, at the monthly auctions on the Hungarian border, Physical Transmission Rights have been replaced by Financial Transmission Rights (allocated capacity is no longer a physical right that can be used by the participant, but it is only a financial right).
- ✓ on the Serbian border, the bilateral coordinated allocation is done for 100% of total capacity: daily auctions are held by EMS (Serbia) and long term and intraday auctions are held by Transelectrica. The intraday allocation is done in six auction sessions for time intervals: 00:00-04:00, 04:00-08:00, 08:00-12:00, 12:00-16:00, 16:00-20:00, 20:00-00:00 CET.
- ✓ Allocation of Physical Transmission Rights and UIOSI („use it or sell it”) principle are applied on the Bulgarian and Serbian borders.

- Long term auctions (yearly and monthly) are currently suspended on the Ukrainian – Romanian border, only unilateral daily auction being organized (until the coordinated allocation rules are agreed, the Ukrainian TSO held a pre-allocation, an prior auction to the auction organized by Romanian TSO).
- The “netting” principle is applied to NTC based daily and intraday allocation.
- The physical transmission rights are used (nominated) in accordance with „m:n” nomination principle;
- Transelectrica’s auctions are held on Damas platform, with euro currency trading;
- Daily auction results on the Serbian border (auction prices, allocated capacities) are provided by the Serbian TSO and long term auction results on the Hungarian and Bulgarian borders are provided by JAO;
- Monthly auctions for July were held as:
 - ✓ import/export Hungary, import/export Bulgaria*, during the period 01 – 31.07.2022;
 - ✓ import Serbia, during the periods 01.07.2022; 02 – 10.07.2022; 11 – 15.07.2022; 16 – 24.07.2022; 25 – 31.07.2022;
 - ✓ export Serbia, during the periods 01.07.2022; 02 – 08.07.2022; 09 – 17.07.2022; 18 – 24.07.2022; 25 – 31.07.2022.

* according to the allocation rules, monthly offered capacity was calculated taking into account the minimum of NTC's monthly values.

Notes:

ATC values on Hungarian and Bulgarian borders are calculated before the reservation of capacity. Offered capacity includes reservation and returned capacity.

Requested = requested capacity that remains after automatic rejection of the offers with credit limit exceeded

Final rights = monthly allocated capacity + yearly allocated capacity after returns and withdrawals.

* on the Hungarian border: Final rights (physical + financial) = monthly allocated capacity (financial rights) + yearly allocated capacity after returns and withdrawals (physical rights).

Usage level of long term capacity rights was calculated as ratio between nominated capacity and allocated physical capacity rights at yearly and monthly auctions, after the returns. Starting with July 2022, the allocation of Financial Transmission Rights is applied on the Hungarian border, therefore only the usage level of yearly allocated capacity is presented in the graph.

From the beginning of the year, the average values (arithmetic) of usage level are: 2.05% on export direction and 8.03% on import direction.

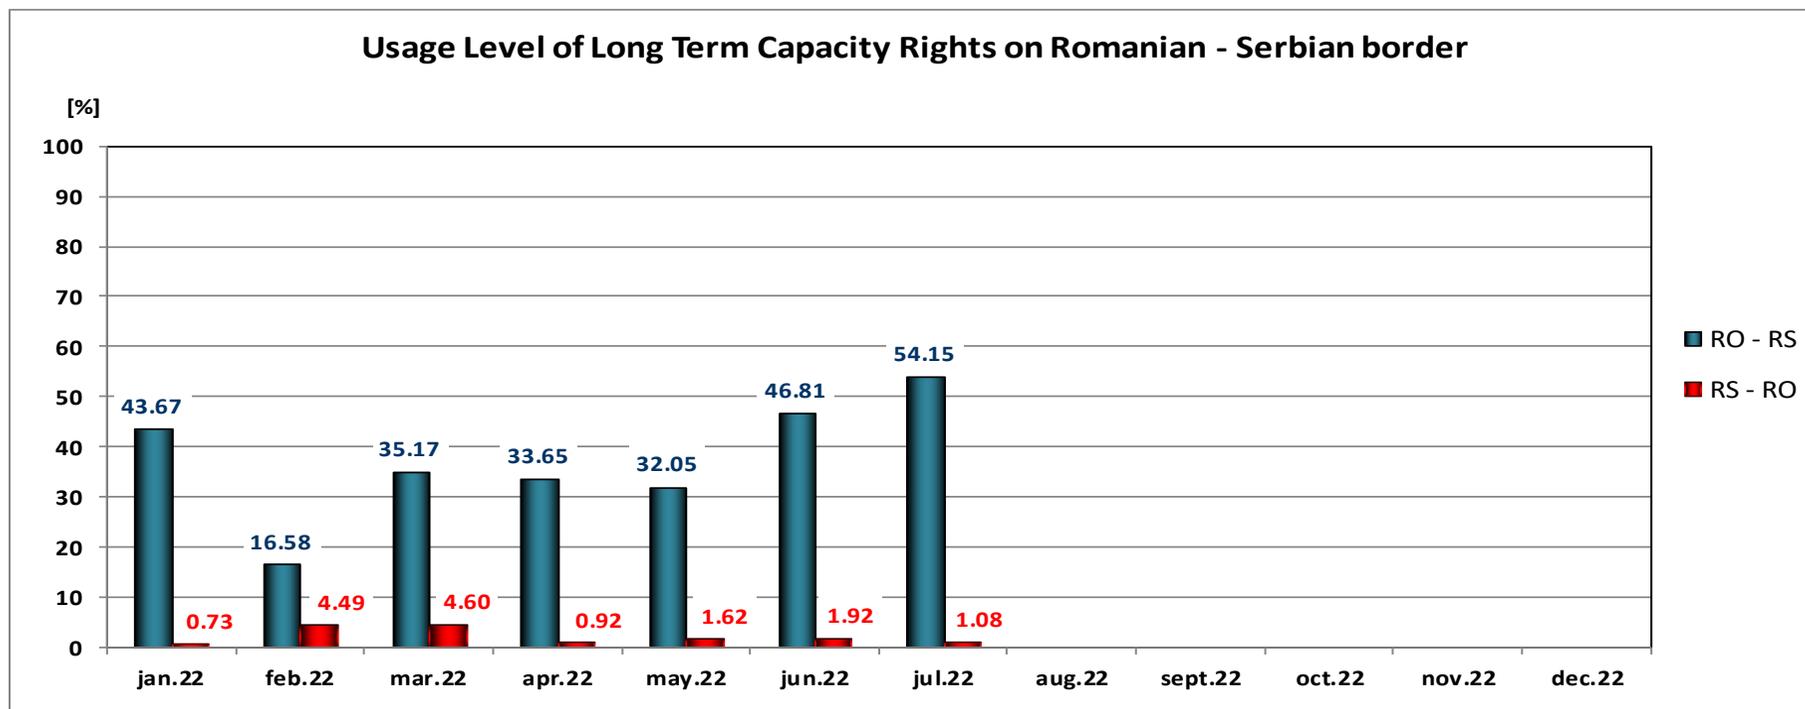

CET

Usage level of long term capacity rights was calculated as ratio between nominated capacity and sum of allocated capacity at monthly and yearly auctions after the returns.

From the beginning of the year, the average values (arithmetic) of usage level are: 0% on export direction and 5.7% on import direction.

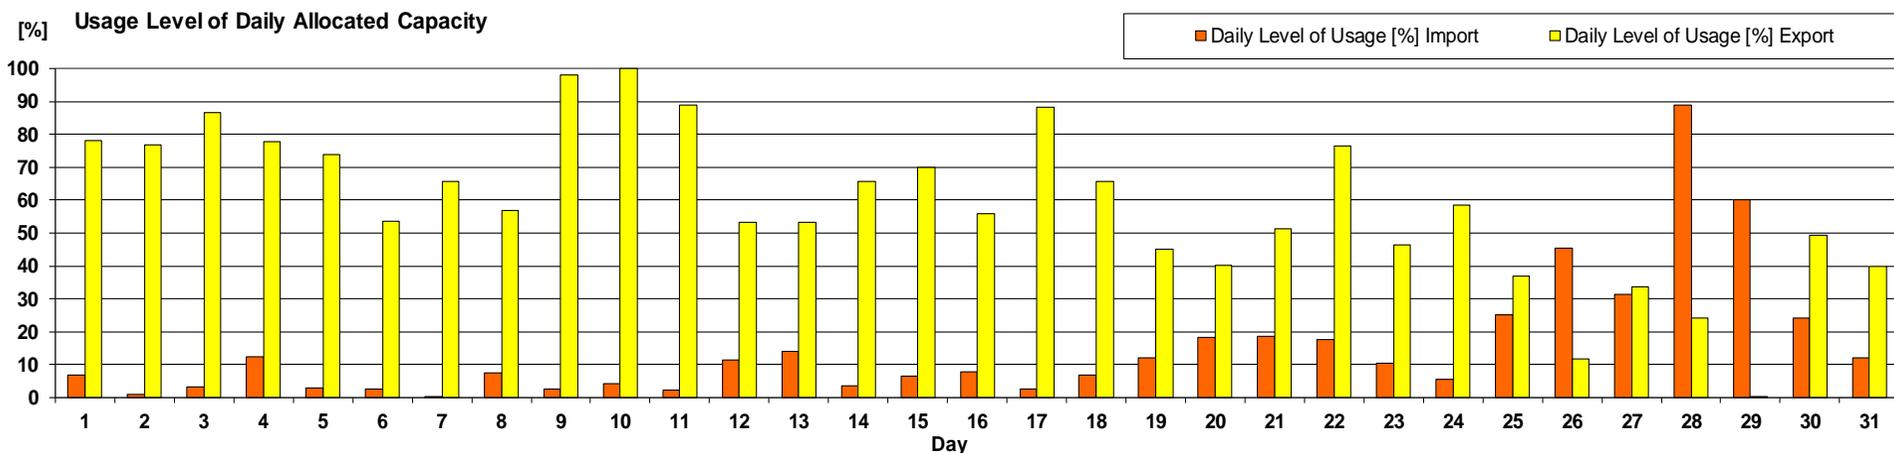

CET

Usage level of long term capacity rights was calculated as ratio between nominated capacity and sum of allocated capacity at monthly and yearly auctions after the returns.

From the beginning of the year, the average values (arithmetic) of usage level are: 37.44% on export direction and 2.19% on import direction.

Compared with previous month, in July 2022 it was noticed an increased level of total capacity rights usage. The highest level of usage for import direction was on the Ukrainian border and for the export direction was on the Hungarian border. Starting from July 2022, the allocation of Financial Capacity Rights is applied at the monthly auctions on the Hungarian border and therefore the usage level of the allocated capacity is calculated by considering only the allocated/nominated values corresponding to the yearly, daily and intraday auctions. On the Ukrainian border monthly auctions are currently suspended.

Serbia export	40	41	33	42	23	71	45					
Serbia import	9	4	37	4	0	1	15					

By making efficient use of the interconnection (applying “netting” principle in daily and intra-day offered capacity calculation) there are some hours in which sum of nominated cross-border schedules is higher than the NTC. Starting with June 2022, the Flow - Based Day - Ahead Market Coupling was launched across the whole Core region (including the RO – HU border). Consequently, counting the hours in which the sum of nominated cross-border schedules was higher than the NTC was no longer considered relevant for RO – HU border.
