Communique - Transelectrica significantly increases its cross-border capacity starting with January 1, 2021

NPG Co. Transelectrica SA, as a Transmission System Operator, provides, starting with January 1, 2021, a significant cross-border capacity with the countries it interconnects with - Bulgaria, Hungary, Serbia and Ukraine - of 2,800 MW on export from Romania and 3,000 MW on import into Romania. Through the extensive investment programme the Company is engaged in, the cross-border capacity will double in the following five years, which will allow the development of coupled electricity markets European-wide, thus contributing to achieving the European Union's objectives, "Internal energy market" and "Clean energy for all Europeans". Strengthening the power transmission network focusing on increasing interconnection capacity is one of the primary goals we have committed to. Romania, through Transelectrica, is part of the European electricity network and has the mission to provide both national energy security and European energy security. The Company has significant investments under way that will contribute to doubling cross-border capacity by January 1, 2026, so as to be in accordance with European requirements, the target being over 5,000 MW. At the beginning of 2020, the cross-border capacity provided by Romania was around 2200 MW export/import.
